Accessing the Field at times of Solidarity

Meeting Abdi (*Co-Researcher*)

The relation to the other is to take the risk to take the unconscious of the other to recognize, to risk identifying with the untranslatable, to take the risk of the displacement of the angle of the vision (Bhabha).

The mirror: the emergence of a third space, a displaced angle of vision .

The mirror effect: a dialogical site

Shelter: a crossroads, border, station, school, home and a prison.

No Education, No safety

The realm of conscious and unconscious process in which a displacement of the angle of vision is the difference between life and death and survival (Bhabha).

Somali photographer highlights refugee plight in 'Erase & Rewind' exhibition

An 18-year-old Somali Abdi Deeq, who lost his father five years ago in a terror attack on Somalia and moved to Turkey with his brother, draws attention to tragedy of the refugees in his photographs.

Deeq says that he aims to show that the refugees are trying to do something under present conditions and presents art lovers with his photographs in the "Erase & Rewind" exhibition in Istanbul.

The moral witness is caught in that moment where the denotative security is shaken by the foreignness of ways of meaning. The moral witness is caught in a double time frame of memory, surviving testimony of the past while aspiring the values of survival in the future. Is the moral witness a forward looking creature? Even when her testimony is about the past? (Homi Bhabha, Locating Culture)
