Lancet Paper «Safety and efficacy of a self-expanding compared to a balloon-expandable bioprosthesis for transcatheter aortic valve replacement in patients with severe symptomatic aortic stenosis: a randomized trial» - SCOPE I trial

Dear Ms Kopp

Twenty-four months after the date of publication, the anonymized data underlying the manuscript plus relevant documentation will be made available to external investigators not affiliated to the trial.

Please send a corresponding written request explaining the proposed use of the data to:

Prof. Dr. Thomas PILGRIM
University Hospital Bern
Department of Cardiology
Freiburgstrasse
3010 Bern
Switzerland

A specific committee will review the requests received and, following approval, enable data transfer.
Best regards

Prof. Dr. med. Thomas Pilgrim
Sponsor Investigator
