We present the case of a 65 years old patient who developed a complete, sensorineural hearing loss on the right side due to an intravestibular schwannoma. Our video shows a transcanal, endoscopic approach with complete schwannoma removal on the right side, subsequent e- BERA recordings, and cochlear implantation.

**KEYWORDS**
cochlear implantation, endoscopic ear surgery, Intralabyrinthine Schwannoma

**Abstract**
We present the case of a 65 years old patient who developed a complete, sensorineural hearing loss on the right side due to an intravestibular schwannoma. Our video shows a transcanal, endoscopic approach with complete schwannoma removal on the right side, subsequent e- BERA recordings, and cochlear implantation.
