WELCOME!

A warm welcome to Kiel!

The Johanna-Mestorf-Academy (with the Cluster of Excellence “ROOTS” and the Collaborative Research Centre 1266 “Scales of Transformation”) is pleased to welcome over 300 active participants, as well as further attendees, to the Kiel Conference: Scales of Social, Environmental and Cultural Change in Past Societies. This conference continues the proud tradition of the “Open Workshop: Socio-Environmental Dynamics Over the Last 15,000 Years: The Creation of Landscapes”, as its seventh iteration, following the conferences in 2009, 2011, 2013, 2015, 2017, and 2019. In addition, the 2021 EAA Annual Meeting took place in Kiel, unfortunately digitally due to the Covid-19 pandemic.

The interplay of environment, social relations, material culture, population dynamics, and human perception are the key factors of socio-environmental changes. The exploration of processes and parameters of societal change enable further exploration of transformations of human-environmental interactions. A transdisciplinary effort of scientists and scholars is necessary to achieve a better understanding of the roots of social, environmental, and cultural phenomena, as well as processes of transformation in a crucial period of human history, from late Pleistocene hunter-gatherers to state societies.

Within this framework, the scientific programme of this conference aims to promote discussion by merging themes that explore the roots of social, environmental, and cultural phenomena and processes, well as different scales of transformations in prehistoric and archaic societies. Therefore, the sessions will explore wide diachronic and interdisciplinary spectra: From Late glacial societies to communities of pre-modern cities, from topics on human adaptation and coping strategies, to those on burial rites, residential behaviour, the formation of complex networks, and past health, as well as different theoretical and methodological approaches covering social, physical, life, and formal sciences. Your diverse contributions will no doubt result in an excellent conference.

I would like to thank Franziska Engelbogen, Jennifer Schüle-Hansen, Nicole Taylor, Andrea Ricci, Anna-Lena Heyn and Angelika Hoffmann, as well as the office teams and student assistants, for their commitment and support in organising this conference!

I wish you an inspiring, fruitful time in Kiel.

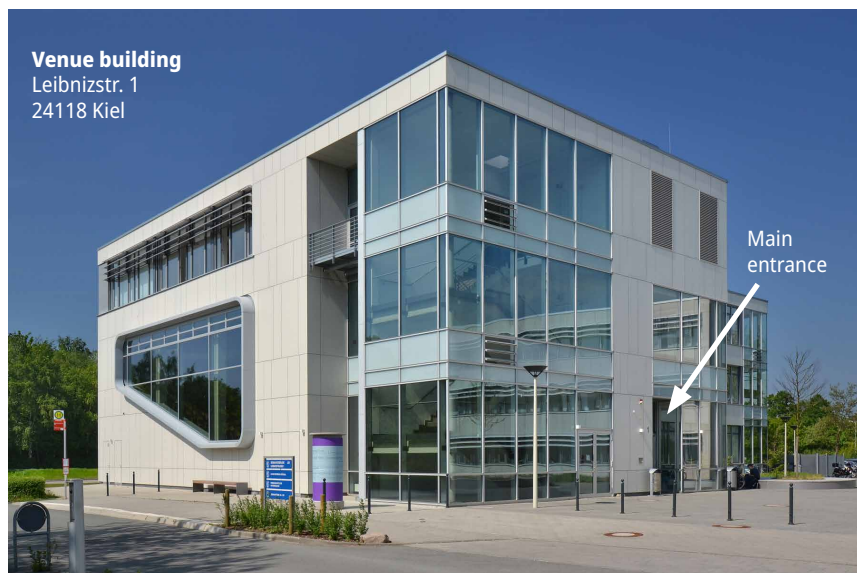

Johannes Müller

Session 08: Analog Modelling the Late Neolithic and the Early Bronze

Chair: Vesa Arponen, John Robb

■ **Tuesday, March 14 • Room 105**

15:30 This workshop session introduces the core ideas behind the analog model being developed in a ROOTS project at Kiel University and offers an opportunity to try out the model. The model seeks to simulate certain selected socio-environmental processes in late Neolithic and early Bronze Age in North Central Europe. The analog model seeks to investigate these questions from an experimental agential perspective afforded by the analog model as something playable by researchers. Of special interest is the modeling of the costs and benefits of selected social interaction processes from inclusive or corporate towards exclusive or personal network forms of social complexity (e.g. Feinman) and how these tie up with archaeological phenomena of the period from material to social changes. After a talk introducing the model (30 minutes), up to 4 audience members have a chance to play the model in supervision of the project's developers and, lastly, participants will be invited to discuss their experience and knowledge gained (2 hours). Any number of interested persons are invited to observe.

Safer Space Policy

The ROOTS and CRC 1266 are committed to ensure that all participants of the Kiel Conference experience a safe and hospitable environment, regardless of age, gender, sexual identity, disability, physical appearance, nationality, ethnicity, or religion. The ROOTS and CRC 1266 will not tolerate direct or indirect discrimination against any person on grounds of any of the above.

We ask all participants to respect the personal boundaries of others, whether they be physical, emotional or cultural. The ROOTS and CRC 1266 believe that people from different backgrounds can bring fresh ideas, thinking and approaches which will make our open workshop both innovative and effective. We support the right of all participants to be able to express their viewpoints without undue interruption. Constructive criticism and dissent are welcome, but should be focussed on the issue, not the person. Please consider the effect your own words and actions may have on others.

The ROOTS and CRC 1266 will not tolerate inappropriate, intimidating or offensive behaviour, whether verbal, written or physical, including harassment or unwarranted and unwelcome attention in any form.

Failure to abide by this policy will result in appropriate action being taken by the ROOTS and CRC 1266 or the conference organisers. If necessary local authorities will be informed.

Any behaviour during the Kiel Conference that contravenes this policy and that has affected you personally or that you have witnessed, should be reported immediately to the ROOTS and CRC 1266 office by email to kielconference2023@roots.uni-kiel.de, or by leaving a note with contact details at the reception desk. Any reports received will be handled by the ROOTS and CRC 1266 board and the organisers with the utmost confidentiality.
