SgP²⁰¹³

keynotes

placebo psychotherapy - is there any other kind?	1
simple heuristics in a social world?	2
toward a natural science of meaning in life.....	3

symposia and presentation

human-machine interaction: automation and methodological issues	4
influence of system reliability in training and testing sessions on operator performance, trust and use of automation	4
effects of system reliability on operator trust and performance over an extended lay-off period	4
using the multifunctional analysis in human factors research	5
the emotiboard: effects of mood feedback in computer-supported work in distributed and co-located teams.....	5
consequences of social categorization.....	7
trust and social categorization: can we trust all whites and blacks?.....	7
the role of the black-sheep effect in employment discrimination	8
gender references in job advertisements	8
selective incivility: immigrant groups experience subtle workplace discrimination at different rates	9
multimethodological approaches in eating and sleep disorders	10
early-onset restrictive eating disturbances in primary school boys and girls	10
relationship between media consumption, negative body image and emotion regulation	11
physiological correlates of susceptibility to media exposure in eds compared to healthy young females and females suffering from mixed mental disorders.	12
are body movements during sleep related to sleep quality?.....	12

motivational determinants and consequences of resource investment	14
implicit affect and the intensity of motivation: new insights	14
energy conservation in isometric hand grip tasks: exerted muscle force increases in proportion to task demand but does not equal it.	14
implicit threat, self-regulatory resources, and cognitive performance	15
“that was exhausting, i need a break!”: a limited theory of willpower predicts rest-goal-activation following self-control exertion.....	16
my job was a stage today – am i exhausted? a diary study on impression management on the job, self-regulatory resources, and exhaustion.....	16
intergroup biases in the context of power, status, and leadership	17
all affected by stereotypes, but really in the same way? the impact of social status on stereotype vulnerability.....	17
sexual harassment at work: a way of dealing with threats to status?	18
a status view on diversity: stereotypical gender-task fit, status, dominance, and individual performance in gender-diverse work groups	18
how women and men project their gender prototypes on leader prototypes	19
crossing motivational borders: motivation in the applied context.....	21
reduced effort mobilization to monetary and nonmonetary rewards and punishments in dysphoria	21
visual avoidance and spider phobia.....	22
the implication of motivational processes in sexual desire.....	22
change of self-regulation in the motivational and volitional phases of behavior change	23
did my m.d. really go to university to learn? detrimental effects of numerus clausus on self-efficacy, mastery goals and learning.....	23
it takes two to tango: on couple interaction and health-related outcomes in a variety of settings.....	25
a view through gloomy glasses: accuracy and bias in relationships of narcissists	25
dyadic invisible social support and smoking behavior: examining the moderating effects of gender	26
touch as an interpersonal emotion regulation process in couples' daily lives: the mediating role of psychological intimacy.....	26
interpersonal emotion regulation and health: a dyadic perspective	27
relationship quality of same-sex couples living in switzerland: a comparison with heterosexual couples	27

the power of self-esteem: influences of self-esteem on important life outcomes.....	29
the effect of self-esteem development on life outcomes: what does self-esteem change explain above and beyond level of self-esteem?.....	29
comparing the effects of low, unstable, and contingent self-esteem on depression: two longitudinal studies	30
self-esteem and relationship satisfaction: the mediating role of perceived regard and perception of partner	30
development of self-esteem and relationship satisfaction in couples: two longitudinal studies	31
high self-esteem prospectively predicts better work conditions and outcomes	31
relationship satisfaction: the influence of communication, commitment, dyadic coping, age, and approach/avoidance goals	32
how do approach/avoidance relationship goals affect communication and relationship satisfaction in dating couples?	32
couple communication: covariation of different forms of communication	33
dyadic coping and emotional, sexual and cognitive commitment in intimate relationships	33
relationship assessment scale: conceptual issues.....	34
somatopsychology: from bench to bedside.....	35
stress-induced analgesia: effects of acute psychosocial stress on pain threshold and tolerance in healthy men	35
efficacy of interventions to improve adherence to highly active antiretroviral treatment in hiv: a meta-analysis.....	35
famoca: family online counseling for families with parental cancer	36
internet-based stress management for pregnant women with preterm labor - an indication of efficacy through pilot data?.....	37
internalizing disorders in children and adolescents.....	38
proposed diagnostic criteria for the dsm-5 of non-suicidal-self-injury in female adolescents: diagnostic and clinical correlates.....	38
understanding the child behavior checklist-juvenile bipolar disorder profile in children with disruptive behavior disorders.....	39
the separation anxiety hypothesis of panic disorder revisited: a meta-analysis	39
agreement between parent and child reports of anxiety among children with high-functioning autism.....	40

identification, intergroup contact and intersectionality: the 3 i's in anti-immigrant and ethnic prejudice research	41
the dark side of heterogeneous in-group identities	41
prejudice and intergroup conflict in youth: a field study in the israel/palestine context.....	42
stigmatized immigrants and voting for the swiss people's party: threat, contact and multicultural ideologies	42
the right hat for the job: a field experiment on discrimination against immigrants and ethnic minorities.....	43
“ivan, rapist and soon to be swiss”, or when male immigrants are represented as a danger to women.....	44
current issues in usability research	45
the relationship between objective eye tracking measures and subjective user ratings in usability testing	45
designing for motivational affordance in citizen science: gamification and meaningful framing enhance users' intrinsic motivation and performance.....	45
a modular approach to the evaluation of user experience: the mecue questionnaire	46
mapping objective structure and color factors in web design to facets of subjective aesthetic perception	46
prototype aesthetics in usability tests – the influence of acoustic, haptic and visual attractiveness on test outcomes	47
promoting cognitive performance	48
transfer in perceptual learning.....	48
visual and auditory working memory training: comparing near transfer effects.....	48
the effects of working memory training in school settings.....	49
promoting prospective memory in old adults: conceptual and methodological remarks	50
time activities promote cognitive health? multimodal data from the I-hab project	50
professional context and the potential for vulnerable situations: the resources to overcome	52
experience of unemployment, well-being and justice beliefs – the role of career adapt-abilities.....	52
should i stay or should i go? predictors of intentions to drop out of education.....	53
selection, optimization and compensation in goal pursuit in the life domains of work, family, and leisure.....	53
being happy at work: do pleasure, engagement and meaning make a difference in the work context?	54

acceptance and commitment therapy (act): testing the breadth of the model.....	56
valued living: does it explain treatment satisfaction better than mere symptom reduction?.....	56
acceptance and commitment therapy for treatment-resistant panic disorder and agoraphobia: results from a randomized controlled trial.....	57
act for patients with chronic obsession, compulsions, and anxiety in an inpatient setting: an effectiveness and process study.....	57
a cognitive modeling approach to judgment and decision making.....	59
haunted by a doppelgänger: irrelevant facial similarity affects rule-based judgments.....	59
comparing perceptual and preferential decision making.....	59
the challenges of human redundancy: modeling social influences in sequential decision-making.....	60
testing a cognitive model of ego depletion.....	61
the role of emotion in social perception and decision-making: interdisciplinary approaches.....	62
infant cuteness as an emotive cue for caretaking behaviour.....	62
implicit race bias decreases the similarity of neural representations of black and white faces.....	63
putting faces in context – the mutual influence of facial expressions, gaze direction, and visual context scenes on visuo-cortical processing.....	63
training compassion – effects on behavior, experience and brain function.....	64
the impact of emotions on beliefs about free will, moral responsibility and determinism.....	64
laughter research in psychology.....	66
infected with amusement — by the laughter of a laughing virtual agent.....	66
automated analysis of laughter from full-body movement.....	67
advances in knowledge on the expressive features of laughter.....	67
in defence of laughter.....	68
a lexical study of laughter.....	68
social neuroscience.....	70
altered social and non-social decision-making in recreational and dependent cocaine users.....	70
uncovering the foundations of human prosociality: the neural correlates of prosocial motives.....	70
do electrophysiological correlates and performance measures of working memory function predict intrusive thoughts?.....	71
common activation patterns between basal cognitive/emotional processes and high-level social interactions.....	71

interacting with patients and peers: social demands in physicians' work	73
how to break the silence: development and evaluation of a speaking up intervention for acute care teams.....	73
quality of teamwork experienced in surgical teams	74
physician behavioral adaptability leads to patient satisfaction	74
physicians' vocabulary in pediatric consultations	75
satisfaction at shift handovers: the importance of accuracy of handover partners.....	75
the power of faces in first impressions – and beyond.....	77
factors influencing men's preference for faces of fertile females	77
that cute baby needs me! further evidence for the “cute is good” stereotype.....	78
appearance-based trait inferences in persuasive communication	78
a novel statistical model of face perception	79
mirror, mirror on the wall, who is the most likeable of all? a novel method to measure self-enhancement regarding diverse personality dimensions	79
relationship research: dyadic coping and related issues	81
the nature of dyadic coping in adolescent couples	81
beyond a quantum of solace: solace as a specific form of dyadic coping.....	81
not enough time for dyadic coping?.....	82
give them what they need. investigating the right dose of couples intervention for different risk groups of dual earner couples	83
how much positivity is needed for children? about the buffers of parental negativity on child adjustment	83
tracking visual cognition: current directions in eye movement research	85
microsaccades boost face identification	85
the role of global and local visual strategies in processing social stimuli	86
mapping information use with gaze-contingent techniques.....	86
eye movements of primary school children during visual search tasks	87

motivation and goals	88
antecedents, mediating mechanisms, and consequences of action crises in personal goals.....	88
getting a fresh start: the effect of new beginnings on motivation.....	89
the aim of conserving energy prevails over the aim of reaching a force standard: evidence from energy investment during handgrip task.....	89
age-related differences in social approach and avoidance goals.....	90
personal resources and limitations as predictors of life adjustment in career counseling and psychotherapeutic practice.....	91
relational perspective of meaning in life at retirement: a qualitative study.....	91
effects of psychosocial work conditions, individual and cultural characteristics on well-being at work.....	92
process predictors of response to brief psychodynamic psychotherapy for depressed inpatient: specific or shared?.....	92
relationships between personality traits, emotional openness, and the expression of defense mechanisms during the first session of a brief psychodynamic intervention.....	93
the many faces of placebos and placebo responses.....	94
factors influencing placebo responses in children and adolescents.....	94
modulatory effects of analgesia-expectation and magical thinking on the laterality of pain response in children.....	95
impact of short-term meditation and expectation manipulation on executive brain functions.....	95
testing components of placebo effects in psychotherapy – an empirical test of concept.....	96
meaningful or meaningless? meaning effects in expressive writing.....	97
psychological interventions promoting health: crossing borders between clinical and health psychology.....	98
integrating sexuality into gynaecological consultations: the mismatch between women expectations and medical practices.....	98
a minimal couple intervention and biopsychological stress levels in everyday life.....	98
empowering those who care: a web-based mental health promotion intervention for relatives of individuals with mental illness.....	99
an expressive writing intervention for mothers of very premature infants.....	100

social sensing for psychology: a grip on assessing interpersonal behavior with the help of computer sciences	101
the behavior revolution in psychology: how automatic social sensing brings interpersonal behavior to center stage in psychology	101

three adult subjects completed questionnaires for (1) seriousness and cheerfulness (of the state-trait-cheerfulness scale; ruch, köhler, & van thirel, 1996) and (2) three different playfulness scales for covering different aspects of the constructs (barnett, 2007; glynn & webster, 1992; proyer, 2012). although those who were high in cheerfulness only scored highest in playfulness, we found support for rahner's thesis. numerous subjects scored high in both seriousness and cheerfulness thus confirming the existence of homines ludentes. it was further found that these subjects were among those scoring highest in playfulness. subjects scoring high in cheerfulness but low in seriousness were, however, even more closely associated with playfulness. the scores for homines ludentes did not differ from the rest of the subjects in the creative and dynamic facets of playfulness. overall, rahner's notion of ernstheiterkeit seems to reflect an important aspect of playfulness.

development of a rasch homogenous short form of the pathological narcissism inventory

eva schürch, university of bern, institute for psychology, bern

carolyn c. morf, university of bern, institute for psychology, bern

natalie ottiger, university of bern, institute for psychology, bern

objective: during the last decades, the narcissistic personality inventory (npi) was the most widely used questionnaire to measure narcissism as a personality trait. but the npi assesses grandiose narcissism only, while recent discussions emphasize the existence of vulnerable narcissism. the pathological narcissism inventory (pni, pincus et al., 2009) is a new questionnaire assessing these different aspects of narcissism. however, with 54 items on seven subscales, the pni is quite long to serve as a screening tool for narcissistic traits. we therefore developed a short form to facilitate its application in research and practice. even though the pni covers different symptoms of narcissism, they are all expressions of the same underlying construct. we therefore used the rasch model to guide the item selection. method and results: a sample of 1837 participants (67.5% female, mean age 26.8 years) was used to choose the items for the short form. two criteria were adopted: all aspects, represented by the seven subscales in the original, should be retained, and items should be rasch homogenous. in a step-by-step procedure we excluded items successively until reaching a homogenous pool of 22 items. all remaining items had satisfactory fit indices and fit-statistics for the model were good. characteristics of the resulting short form were tested using a new independent validation sample (n=104, mean age = 32.8, 45% female). correlations of the short pni with different validation measures were comparable to the correlations obtained with the original form, indicating that the two forms were equivalent. conclusion: the resulting one-dimensional measure can be used as a screening questionnaire for pathological narcissism. the rasch homogeneity facilitates the comparison of narcissism scores among a variety of samples.

the psychology behind honesty: who is cheating less?

michael solèr, department of psychology, university of zurich

carmen tanner, department of banking & finance institute, university of zurich
