Fani Kakridi Enz  
Case for the Workshop:  
“Showcasing Knowledge and Information  
Services”

Euforic and the EADI Working Group on Information Management  
Geneva, 24 June 2008

# inforesources

- Is a network aiming to contribute to sustainable development by providing information on natural resources and international co-operation
- Its target public consists of development practitioners and those seeking careers in development (students, etc.)
- Inforesources services are also available to the public

Selects, comments on and disseminates information on NR and development

- Explicitly addresses the policy, implementation and research levels
- Seeks innovative approaches and
- Upcoming themes (Trend Scouting)

- Works pro-actively through its publications:  
InfoResources Focus  
InfoResources News  
InfoResources Trends  
  
in English, French and Spanish,  
electronically and in print,  
free of charge
- ... and re-actively through its Question and Answer Service

# inforesources

- Is embedded in a large and multifaceted knowledge network and can draw on its experience
- Gives a voice to people in the South through partnerships in Africa, Latin America, and Asia

Everything you always wanted to know about natural resources and development – commented on, structured, and in your choice of language!
