Figure 1.

Root damage [Oleson's scale]

Susceptible Tolerant

Ph: ns
Inf: ***
Ph * Inf: ns

Control Infested
Figure 2.

A. Two weeks infestation (day 14)

- Susceptible: Control [15g] vs. Infested [20g]
- Tolerant: Control [15g] vs. Infested [18g]

B. Four weeks infestation (Day 28)

- Susceptible: Control [20g] vs. Infested [30g]
- Tolerant: Control [30g] vs. Infested [40g] (***)

C. Four weeks infestation (Day 28)

- Susceptible: Control [1.5] vs. Infested [2.5]

**Note:** The root regrowth scale is indicated for each group, showing significant differences (*) in the tolerant group compared to the susceptible group.
