Table 3 – Asthma, allergy, and respiratory outcomes, cancer	r, growth and obesity,
metabolic syndrome, sexual maturation	Page 32

Annex 1: ENRIECO Inventory Questionnaire

A. Basic Protocol Description (update of www.birthcohorts.net)

A1. Identification

- Cohort name:
- Principal investigator:
- Contact(s) for environmental exposures:
- Cohort website:
- Key publication(s) of cohort protocol/methods/description:

A2. Basic Description

• Main aim/objectives/focus of cohort:

•	Source population
	nation-based
	region-based
	hospital-based
	selected (high-risk, exposure etc.), describe:
	other:

- Geographical coverage, please describe: ______
- Calendar period of enrolment calendar years of start and finish: ______

Enrolment - status:
completed
ongoing
planned

• **Developmental period of enrolment** – give developmental period of start of enrolment:

pre-pregnancy	
pregnancy, give pregnancy week(s)	weeks of pregnancy
at birth	
postnatal, give month(s)	months of age

- Enrolment criteria, please describe in and exclusion criteria:
- **Expected number of participants** at enrolment when enrolment completed:

____ mothers _____ fathers _____ children

• Expected duration of follow-up: _____ years

A3. Basic Data Collection Scheme

Type of data collection	Pregnancy			Birth	Post natal				
(Give estimate of number of subjects for each period where data/samples are available: N=XXX)	1 st trimester	2nd trimester	3rd trimester		0-6 months	7-18 months	18-60 months	5-10 years	10+ years
Questionnaires:									
maternal exposures									
paternal exposures									
offspring exposures									
maternal outcomes									
paternal outcomes									
offspring outcomes									
Biological samples:									
maternal blood									
paternal blood									
cord blood									
offspring blood									
maternal urine									
paternal urine									
offspring urine									
maternal other (hair, nails, saliva, breast									
milk, etc.)									
Paternal other (hair, nails, saliva etc.)									
offspring other (hair, nails, saliva, etc.)									

B. Exposure Assessment

B1. Outdoor Air Pollution

- Were *outdoor* air pollution exposures assessed for the members of your cohort?
- yes

not yet, but planned. Please give predicted year of completion: 20_____ no, please proceed to part B2

Which air pollutants were/will be assessed (multiple answers possible)?

nitrogen dioxide (NO ₂)
nitrogen oxides (NO _x)

] particulate matter $< 10 \ \mu g$ in diameter (PM₁₀)

-] particulate matter $< 2.5 \ \mu g$ in diameter (PM_{2.5})
-] soot content of particulate matter
- ozone (O₃)
- others: _____

•

Which types of exposure assessment were/will be used (multiple answers possible)?

- dispersion modelling
- land-use regression modelling

routine air monitoring network measurements (e.g. nearest monitor, interpolation)

- exposure indicator variables (e.g. traffic density; proximity to traffic/industry from geographic information system)
- questionnaires (e.g. self-reported traffic densities; proximity to traffic or industrial sources; wood smoke exposure). Please describe:

] individual measurements (e.g. personal monitoring, stationary measurements outside/inside participants' homes). Please describe:_____

• Details of the assessments (complete table with pollutant, assessment method, timing, and rough number of assessments):

Type of air pollut	Preg	nancy (mo	Post natal (child)	Number/% of the		
Air pollutant	Method	1 st trim.	st trim. 2nd 3 rd trim. trim.		Age	cohort
~						
Completed:						
Planned:						

B2. Indoor Contaminants (for example from combustion sources, cleaning products, or any indoor exposures not already included in other sections)

• Were exposures to *indoor* contaminants assessed for the members of your cohort?

yes not yet, but planned. Please give predicted year of completion: 20_____ no (proceed to part B3)

Which indoor contaminants were/will be assessed?

nitrogen dioxide (NO₂) VOCs gas cooking / heating / appliances

cleaning products

others:

Which types of exposure assessment were/will be used (*multiple answers possible*)?

modelling

] individual measurements (e.g. personal monitoring, indoor air monitoring)

] questionnaires (e.g. use of gas cookers, type of heating system, use of cleaning products)] other:

• Details of the assessments (complete table with pollutant/contaminant, assessment method, timing, and rough number of assessments):

Type of indoor co assessment	_	nancy (mo	Post natal (child)	Number/% of the		
contaminant	Method	1 st trim.	2nd	3 rd trim.	Age	cohort
			trim.			
Completed:						
Planned:						

Further description:

B3. Water Contamination

 Were water contaminants assessed for the members of your cohort? yes not yet, but planned. Please give predicted year of completion: 20 no (proceed to part B4)
 Which water contaminants were/will be assessed? disinfection by products pesticides metals endocrine disrupting substances others:
 Which type of assessment/questionnaire questions are/were used? routine monitoring water concentration data from water companies or government newly collected water concentration data (measurements) questionnaire: information on tap/bottled water ingestion information on coffee, tea and other tap water based beverage ingestion information on swimming habits information on showering/bathing habits personal biomonitoring other:

• Details of the assessments (complete table with pollutant/contaminant, assessment method, timing, and rough number of assessments):

Type of water contaminant assessment		Pregnancy (mother)			Post natal (child)	Number/% of the cohort	
contaminant	Method	1 st trim.	2nd trim.	3 rd trim.	Age		
Completed							
Planned:							

Further description:

B4. Allergens and biological organisms

• Were exposures to allergens and biological organisms assessed for the members of your cohort?

yes

not yet, but planned. Please give predicted year of completion: 20_____

no (proceed to part B5)

• Which allergens and biological organisms were assessed or will be assessed (indicate whether completed or planned)?

Type of allergens	Assessment	method	Timing of	f the assessment (plo		% or N of the
	Direct measurement from	Surrogate*	During	0-1 years	During Early	cohort measured
	house dust or air samples	(please specify)	pregnancy	(up to 12 months)	Childhood	conort measureu
Mite- Der p						
Der f						
Pets- Cat						
Dog						
Other pets (please specify)						
Mold-Cladosporium						
Penicillium						
Aspergilus						
Alternaria						
Other mold allergens						
Cockroach						
Pollen						
Other						
Other bio-contaminant:						
Pests & Vermin						
Endotoxin						
Mold-Eps						
Glucan						
Other mold species						
Other						

* Please specify the surrogate measures, for example: cat ownership for cat allergen, humidity for mold exposure in general, spore counts for mold allergen, season of birth for specific pollen.

B5. Heavy Metals

• Was exposure to heavy metals assessed for the members of your cohort?

] yes
not yet, but planned. Please give predicted year of completion: 20
no (please proceed to part B6)

• Which agents were/will be assessed?

r	mercury (Hg)
1	ead (Pb)
C	cadmium (Cd)
a	arsenic (As)
<u> </u>	manganese (Mn)
t	total metals spectrum
c	other:

• Which type of assessment was/will be used?

- biological sampling
- environmental sampling
- questionnaires
- occupational exposure / JEM
- dietary exposure (please specify: _____)
- through tap water consumption
- Details of the biomonitoring analyses (complete table with heavy metal, medium, person, timing, and rough number analysed):

Type of heavy metal		Preg	Pregnancy (mother)			Post natal (child)		
assessment								
Metals	Medium	1 st trim.	2^{nd} trim.	3 rd trim.	child)	Age	Number	
Complete	<i>d</i> :							
Planned:								

B6. Pesticides

 Was exposure to pesticides assessed for the members of your coh

yes
 not yet, but planned. Please give predicted year of completion: 20_____
 no (please proceed to part B7)

Assessment of exposure at *individual* level

- Which type of assessment was/will be used?
- biological sampling
- questionnaire data on self-reported pesticide use (in home)
- occupational exposure
- dietary exposure
- environmental survey (dust, etc...)
- _____ other: ______

• Details of the assessments (complete table with pesticides type, medium, person, timing, and rough number of assessments):

Type of pesticide ass	ype of pesticide assessment		Pregnancy (mother)			Post natal (child)	
Pesticide	Medium	1 st trim.	2nd trim.	3 rd trim.	(mother or child)	Age	Number
	Γ						
Completed:							
Planned:	1						

Assessment of exposure at a *geographical* level:

• Which type of assessment was/will be used?

land/crop data:	
geographical scale (national, regional, etc.):	
years available (relevant to your cohort):	
pesticide usages in crops:	
official recommendations or real uses:	
geographical scale (national, regional, etc.):	
years available (relevant to your cohort):	
drinking water contamination:	
groups of pesticides:	
frequency (yearly, monthly, etc.):	
air measurements:	
groups of pesticides:	
frequency (yearly, monthly, etc.):	

B7. Radiations: EMF/UV/ionising

• Were any of the following sources of non-ionising or ionising radiation exposure assessed for the members of your cohort?

power lines

mobile phone handsets (use of a mobile phone)

mobile phone base stations

other RF exposures such as WiFi, cordless phones

occupational EMF exposure

] sun (sun bathing, sun beds, application of protection creams, etc)

- medical ionising radiation exposures (CT scans, X-rays, interventional cardiology procedures)
- residential radon exposure
-] not yet, but planned. Please give predicted year of completion for the specific exposure:
- no (proceed to part B8)

Which type of assessment was/will be used? (copy for each exposure source separately)

personal monitors

environmental measurements

questionnaire data

geographical data on source location (for power lines, mobile phone base stations, radon)

] individual data from mobile phone network operators

occupational exposure / JEM

• Details of the assessments (complete table with type of assessment, person, timing, and rough number of assessments):

Type of assessment		Pregnancy (mother)			Birth	Post natal (child)	
Exposure	Method	1 st trim.	2nd trim.	3 rd trim.	(mother or child)	Age	Number
Completed:							
Planned:							

B8. Smoking and Second-hand Smoke (SHS)

A. Active smoking of the *mother*

•	Was exposure to <i>active</i> tobacco smoke assessed for the members of your cohort?
	yes
	not yet, but planned. Please give predicted year of completion: 20
	no (proceed to second-hand smoke)
•	Which type of assessment was used for verifying active smoking (of the mother)?
	biological sampling
	questionnaire data (self report)
	other:
•	If biomarkers were used to verify active smoking status, if known, what was the cut- off used?
	serum cotinine > ng/ml
	urinary cotinine > ng/ml
•	If questionnaires were used, which of the following information is available:
	number of cigarettes smoked per day/week/month
	at one point during pregnancy
	at different time points during pregnancy
	before pregnancy
	time (week/month) before conception at which mother quit smoking
	time (week/month) during pregnancy at which mother quit smoking other:
	omer
B.	Passive smoking / second-hand smoke (SHS)
•	Was exposure to <i>passive</i> tobacco smoke / environmental tobacco smoke /second hand smoke (SHS) assessed for the members of you cohort?
	yes
	not yet, but planned. Please give predicted year of completion: 20
	no (proceed to part B9)
•	For which members of your cohort did you collect information of exposure to SHS?
	pregnant women
	children, age:
	other:
•	Which type of assessment was used for evaluating exposure to SHS (mother/child)?
	biological sampling (i.e cotinine, NNAL)

environmental measurements (nicotine dosimeters, indoor PM 2.5 monitors, dust swipes) questionnaire data (who smokes at home, at work, visiting smoky places)

_____ other:______

• Details of the active and passive smoking assessments (complete table with type, method, person, timing, and rough number of assessments):

Type of smoking	g assessment	Preg	nancy (mot	her)	Birth	Post natal (child)	
Compound	Medium	1 st trim.	2^{nd} trim.	3 rd trim.	(mother or child)	Age	Number
Completed:							
NNAL							
Cotinine							
Maternal smoking							
Smoking in home							
Smoking in working place							
Smoking in bars/cafes (before ban of tobacco smoke)							
Planned:							

B9. Noise

•	Was noise	exposure	assessed	for the	members	of your	cohort?

yes
not yet, but planned. Please give predicted year of completion: 20_____
no (proceed to part B10)

A. Objective assessment

• Was noise data collected by *objective* assessments – noise measurements or noise maps?

yes ves

- If yes please provide details:

B. Passive assessment

• Was noise data collected by *subjective* assessments?

yes: participants were asked for subjective description of noise exposure:

at home	
during day	,
at night	
roads/traffic	
airplanes	
other:	

yes: personal feeling of noise annoyance/disturbance (degree with Likert scale etc) no

• Details of the noise assessments (complete table with type of assessment, timing, and rough number of assessments):

Type of noise assessment		Pregnancy (mother)			Birth	Post nat	al (child)
Noise	Type of	1 st trim.	2nd	3 rd trim.	(mother or	Age	Number
	measurement		trim.		child)		
Completed:							
Planned:	•						

B10. POPs

• Was exposure to POPs (PCBs, dioxins, etc.) assessed in biological samples for the members of your cohort?

not yet, but planned. Please give predicted year of completion: 20_____ no (proceed to part B11)

•	Which (groups of) POPs were assessed?
	aldrin
	chlordane
	DDT and metabolites
	dieldrin and endrin
	heptachlor
	hexachlorobenzene
	mirex
	polychlorinated biphenyls
	polychlorinated dibenzo-p-dioxins
	polychlorinated dibenzo furans
	toxaphene
	brominated flame retardants
	flourinated compounds
	organometallic compunds (TBT)
	other:

• Details of the assessments (complete table with POP type, medium, person, timing, and rough number of assessments):

Type of POP assess	ment	Pregnancy (mother)			Birth	Post nat	al (child)
POPs	Medium	1 st trim.	2nd	3 rd trim.	(mother or	Age	Number
			trim.		child)		
Completed:							
Planned:							

•	Was	fatty	acids	measured	in	the	blood	sampl	les?
•	vv as	Taily	acius	measureu	111	une	nioou	samp	UD •

yes, specify which ______

not yet, but planned

B11. Occupation

• B11a. Was occupational history collected for the members of your cohort?

yes not yet, but planned. Please give predicted year of completion: 20_____ no (proceed to B11.b)

• Please tick below the periods for which this data was collected and whether it is available for mother and father? Please indicate whether data was collected *prospectively* or *retrospectively*?

	Before		Pregnancy			Timing of the
	pregnancy	1 st trimester	2nd trimester	3 rd trimester	prospective	questionnaire
Mother						
Father						

• Indicate below the codes used for recording occupation and industrial activity in your cohort:

occupation (ie ILO 1968, or national coding system):

industrial activity (ie ISIC 1971):

no coding, but checklist of occupations

no coding, but recording of job title and/or task performed

• B11.b Was any specific occupational exposure assessed?

yes

not yet, but planned. Please give predicted year of completion: 20_____ no

• If yes, specify the list of occupational exposures assessed (*ie solvents, hair sprays, mercury, endocrine disruptors, etc...*):

Which type of assessment was used? (copy the section for each category of exposure):
biological sampling
environmental sampling
questionnaires on specific exposures or jobs (e.g. health care workers, hairdressers, agriculture, etc)
Job Exposure Matrix (JEM)
expert judgment
other:______

• Please provide details for the specific occupational exposures. Please indicate whether data was collected prospectively or retrospectively?

Assessment	Before		Pregnancy		Retrospective
	pregnancy				or
		1 st trimester	2nd trimester	3 rd trimester	prospective

B11c. Other data available at a national level:

• Are you aware of any JEMs built in your country in the recent period (covering the enrolment period of your cohort)?

- Which exposures were assessed?
- Which coding system was used?
- Please give a reference or report number describing these JEMs:

B12. Other chemical exposures: e.g. BPA, phthalates, etc.

Was exposure to any other chemicals assessed for the members of you cohort? • yes not yet, but planned. Please give predicted year of completion: 20_____ no

Which agents were/will be assessed? •

	bisph	enol	Α	
	phtha	lates	S	
•	Whie	ch ty	pe of	asses

ssment was used?

Ľ	biological sampling
	environmental sampling (dust, etc)
	questionnaire data (use of hair sprays, cosmetics, food containers,), please
s	specify
	occupational exposure / JEM

dietary exposure

other: _____

Details of the assessments (complete table with type of substance, medium, person, • timing, and rough number of assessments):

Type of assessment		Pregnancy (mother)			Birth	Post natal (child)	
Pesticide	Medium	1 st trim.	2nd	3 rd trim.	(mother or	Age	Number
			trim.		child)		
Completed:							
Planned:							

C. Health Outcome Assessment

C1. Reproduction and Birth outcomes

• Was data on reproductive and birth outcomes collected for the members of your cohort?

yes

not yet, but planned. Please give predicted year of completion: 20_____

 \square no (proceed to part C2)

ye	ot yet, but planned. Please give predicted year of completion: 20
ye	ot yet, but planned. Please give predicted year of completion: 20
ye	ot yet, but planned. Please give predicted year of completion: 20 o s, was the duration of the pregnancy attempt until the start of the infertility treatment
• C	ongenital anomalies:

[yes. Please give %/number of subjects for whom this information was collected:	
[not yet, but planned. Please give predicted year of completion: 20	
	no	

 Specific anomalies of the male reproductive system: 	
 yes. cryptorchidism (if planned, year) hypospadias (if planned, year) anogenital distance (if planned, year) 	
 no Spontaneous abortions (until 21 weeks of amenorrhea) 	

] yes. Please give %/number of subjects for whom this information was collected:
not yet, but planned. Please give predicted year of completion: 20
no

Stillbirths (after 22 weeks of amenorrhea)

] yes. Please give %/number of subjects for whom this information was collected: _	
not yet, but planned. Please give predicted year of completion: 20	
no	

Medical termination of pregnancy

If yes, please indicate if information on the reason of the termination of the pregnancy is known, and if the presence of congenital malformations has been recorded.

Birth weight

] yes. Please give %/number of subjects for whom this information was collected: _	
_	not yet, but planned. Please give predicted year of completion: 20	

ino If yes, please indicate how the data were collected:

Self-reported from mothers

Medical record, midwife or doctor reported

Other, specify_____

Gestational Duration

yes. Please give %/number of subjects for whom this information was collected: ______

not yet, but planned. Please give predicted year of completion: 20_____

L no If yes, what is the origin for the calculation of gestational duration?

self-reported last menstrual period (by study subject)

Medical record: midwife or physician assessed last menstrual period (on basis of self-

report, but assessed and recorded by medically qualified person)

ultrasound

other:

Premature Rupture of Membranes

] yes. Please give %/number of subjects for whom this information was collected:	
not yet, but planned. Please give predicted year of completion: 20	
] no	

Onset of labour (spontaneous, induced, caesarean section before onset, ...)

• Mode of delivery (spontaneous vaginal birth, operative vaginal birth, caesarean section)

• Ultrasound measurements

] yes. Please give %/number of subjects for whom this information was collected: _____

not yet, but planned. Please give predicted year of completion: 20_____

no

If yes, describe how many ultrasounds, which gestational weeks:

Doppler measurements (of uterine, umbilical, fetal cervical arteries, or other)

yes. Please give %/number of subjects for whom this information was collected: _____

not yet, but planned. Please give predicted year of completion: 20_____

no

If yes, describe the arteries concerned, which gestational weeks, how many (or percentage of) women:

C2. Neurodevelopment

- Was data on neurodevelopmental and behavioural outcomes collected for the members of your cohort?
- yes

not yet, but planned. Please give predicted year of completion: 20_____

no (proceed to part C3)

Which of the following outcomes were assessed in the children:

- neuropsychological assessment (e.g. developmental tests for executive function, memory, language, IQ)
 - behaviour (ADHD symptoms, etc)
 - autism symptoms
 - school achievements/performance
 -] neurophysiology/neuroimaging: _____
 - other:
- Details of neurobehavioural and cognitive development assessment of child (number completed or planned)

Name of test/assessment and year	Birth	Post natal (give months/years of age)				
(Bayley, McCarthy, Griffith,)		e.g. 14 months		4 years		
Dubowitz						
Bayley scales of infant development (BSID)						
Griffiths Mental Development scales						
McCarthy scales of children's abilities (MSCA)						
Wechsler Preschool and Primary scale of Intelligence (WPPSI)						
Others:						

• Which of the following assessments were completed in *mothers and fathers*:

Type of assessment	Name of test	Timing	Number/% of cohort
maternal IQ			
paternal IQ			
maternal mental health			
paternal mental health			
maternal stress			
Paternal stress			

maternal attachment		
paternal attachment		
Other		

C3. Allergies and Asthma

• Was data on asthma and allergies collected for the members of your cohort?

yes

not vet, but planned. P	lease give predicted year of completion: 20
no (proceed to part C4)	

Which of the following outcomes were assessed in the children:

asthma

allergies (other than allergic rhinitis)

allergic rhinitis (indoor/outdoor)

eczema

respiratory infections (upper/lower)

food allergies

<u>Asthma</u>

Which of the following methods to assess asthma were used?

parental questionnaires / interview (wheezing, asthma symptoms)

doctor's diagnosis of asthma (by study doctor or parent-reported doctor's diagnosis)

lung function tests

oscilometry

spirometry

bronchial challenge test

tested reversibility (bronchodilators)

interrupter technique (Rint)

exhaled NO

Allergic Rhinitis

Which of the following methods to assess allergies were used?

parental questionnaires/ interview (sneezing, runny nose, nasal congestion, itching of the nose, and post nasal drip)

doctor's diagnosis of allergy (by study doctor or parent-reported doctor's diagnosis)

sensitization assessment (blood samples, SPT (skin prick test), urine samples)

Eczema

• Which of the following methods to assess eczema were used?

parental questionnaires/ interview

doctor's diagnosis of allergy (by study doctor or parent-reported doctor's diagnosis)

Allergic Sensitization Assessment

Were IgE-antibodies to common inhalant allergens analysed in biological samples?

yes yes

If yes, describe the specific IgE measured:

total IgE
IgE mite
IgE cat
\prod IgE dog
IgE pollen
IgE grass
\Box other includ

other, including food allergies

• Were skin prick tests (SPT) performed?
yes yes
no
If yes, indicate the specific SPT performed:
mite
🗌 cat
dog
pollen
mould
others, including food allergens

• Details of asthma and allergy assessment of child (number completed or planned)

Type of assessment and timing		Birth	Post	Post natal (give months/years of age)		
Outcome	Method					Number/% of cohort
Completed:						
Planned:						

C4. Cancer

•

•	Is information on childhood cancers collected for your cohort
	yes
	not yet, but planned. Please give predicted year of completion: 20
	no

Please describe how:

linkage to cancer registry
dother:

• What is the estimated annual number of childhood cancer cases in your cohort

- 0-1 years:
- 1-2 years: _____
- 2-5 years:
- 5-10 years:

(or other, convenient, age categories)

Are genotoxicity markers measured in your cohort?

yes

not yet, but planned. Please give predicted year of completion: 20_____ no

Details?

C5. Childhood growth and obesity, sexual maturation, other outcomes

- Is information on childhood growth, obesity, sexual maturation, or other metabolic and endocrine disorders, collected for your cohort?
- yes

not yet, but planned. Please give predicted year of completion: 20_____

no, please go to section D

Which of the following outcomes were assessed in the children:

childhood growth and obesity

indicators of metabolic syndrome

diabetes

sexual maturation

other:

• **Details of childhood growth and obesity assessments** (give number/% completed or planned)

Type of assessment	Birth	Post natal (give months/years of age)					
(self-report, medical record, measurement, etc)							
		record, measurement,	record, measurement,	record, measurement,	record, measurement,	record, measurement,	

• **Details of metabolic syndrome indicator assessments in children** (give number/% completed or planned)

Indicator	Type of assessment	Birth	Post natal (give months/years of age)					
	(include whether							
	fasting samples)							
Blood pressure								
Cholesterol								
Cholesterol								
Triglycerides								
Glucose								
Insulin								
Other:								

• **Details of sexual maturation assessments** (give number/% completed or planned)

Measure	Type of assessment	Birth	Post natal (give years of age)				
	(self-reported child/mother, evaluated by doctor,)						
Tanner stage							
Puberal Development Stage							
Age at							
Age at voice change							
Gonadal axis hormones							
Other:							

• Other outcome assessments, including other biomarkers of effect (e.g. thyroid hormones, CRP, etc)

Measure	Type of	Prenatal	At birth	Post natal (give months/years of age)					
	assessment	(mother)							

D. Other information – including genetic and important covariates - all please comment

D1. Genotyping:
Have genetic analyses been performed
yes, GWAS
yes, specific genes:
not yet, but planned. Please give predicted year of completion: 20
no
D2. Residential history and time-activity (tick which are available)
Home addresses available:
only once:
during pregnancy
at birth
during follow-up: week/month:
residential history
 Work addresses of mother during pregnancy:
yes
no
School/daycare addresses of child
yes
no
Were these addresses geocoded?
yes, specify which
not yet, but planned. Please give predicted year of completion: 20
no
D3. Time activity patterms
 Was information on time-activity patterns collected: for child
questionnaire, specify when
<pre> questionnaire, specify when diary, specify when</pre>
<pre> questionnaire, specify when diary, specify when for mother</pre>
 questionnaire, specify when diary, specify when for mother questionnaire, specify when
<pre> questionnaire, specify when diary, specify when for mother</pre>
 questionnaire, specify when diary, specify when for mother questionnaire, specify when diary, specify when
 questionnaire, specify when diary, specify when for mother questionnaire, specify when diary, specify when D4. Sociodemographic variables
 questionnaire, specify when diary, specify when for mother questionnaire, specify when diary, specify when D4. Sociodemographic variables mother's social class (coded from occupation), specify coding system
 questionnaire, specify when diary, specify when for mother questionnaire, specify when diary, specify when D4. Sociodemographic variables
 questionnaire, specify when diary, specify when for mother questionnaire, specify when diary, specify when diary, specify when D4. Sociodemographic variables mother's social class (coded from occupation), specify coding system father's social class (coded from occupation), specify coding system
 questionnaire, specify when diary, specify when for mother questionnaire, specify when diary, specify when diary, specify when D4. Sociodemographic variables mother's social class (coded from occupation), specify coding system father's social class (coded from occupation), specify coding system household income
 questionnaire, specify when diary, specify when for mother questionnaire, specify when diary, specify when diary, specify when D4. Sociodemographic variables mother's social class (coded from occupation), specify coding system father's social class (coded from occupation), specify coding system household income mother's education
 questionnaire, specify when

D5. Breastfeeding
weeks of breastfeeding
weeks of exclusive breastfeeding
D6. Diet and physical exercise
Dietary assessments
yes:
FFQ
24 hour recall
other:
person (child/mother):
timing (e.g. stage of pregnancy, age of child):
no
Assessment of physical exercise:
yes:
measurements
person (child/mother):
timing:
no
D7. Medical history
 Is the following information collected for the parents?
family history
pre-pregnancy medical history of mother
pregnancy complications
blood pressure measurements
maternal hypertension
preeclampsia
maternal allergic history
paternal allergic history
D8. Parental anthropometry
maternal pre-pregnancy weight, height
maternal pregnancy weight, height
paternal weight/height

D9. Other/Comments

Annex 2: Assessment of birth outcomes in European birth cohorts participating in ENRIECO ^a

Cohort	Time to			Gestational	Birth	Mode of	Ultrasound
