

Intro

Thank you for taking part in this scientific survey study conducted by the [Chair of Sociology at the Swiss Federal Institute of Technology Zurich](#).

You will receive a payment of \$1 for completing this 8-minute survey.
In addition, you can earn an extra \$2 if you \${e://Field/introtext}.

Rest assured, your privacy and anonymity is guaranteed.

Please continue!

Research in decision making shows that when making decisions and answering questions, people sometimes prefer not to pay attention and to minimize their effort as much as possible. Some studies show that over 50% of people don't read through questions carefully. If you are reading this question, please select the box marked 'other' and type 'Got it' in the box below. Thank you for taking the time to read through this and the following questions carefully!

In your opinion, what is this study about?

- ☐ Decision making
- ☐ Effort in answering questions
- ☐ Payment and answering questions
- ☐ Other

Cheatgame: Manual condition setting

Here you set the dicegame condition MANUALLY ==> For testing, in the survey this is preset. (The variable is taken from the "embedded data".)

There are 2 different cheating games: the prediction and the reporting game (predict/report)

Each with internal and external dice (_int/_ext)

Each also in a non-incentive version, where respondents don't win anything (_noinc)

- ☐ predict
- ☐ roll6
- ☐ *** below are not used variants***
- ☐ predict_ext
- ☐ report_ext
- ☐ predict_ext_noinc
- ☐ report_ext_noinc
- ☐ predict_int_noinc
- ☐ report_int_noinc
- ☐ compare_int
- ☐ test

Here you set the RND-Variable manually

	1	2	3	4	5	6

- ☐ 4
- ☐ 5
- ☐ 6

Cheatgame: Predict roll (predict)

Here you can earn an extra \$2 if you succeed in predicting the outcome of a dice roll:

1. In a first step, you predict the roll of the dice: 1, 2, 3, 4, 5, or 6.
2. In a second step, you roll a virtual dice, which like a real dice is completely random.
3. In the third step, you compare your prediction with the outcome.
 - If your prediction is correct, then you earn \$2.
 - If your prediction is wrong, you don't earn anything.

These page timer metrics will not be displayed to the recipient.

SQ: CM unrelated question (CMunrq)

To secure your privacy and to make you feel comfortable answering the following questions, we employ a special survey technique.

It works by asking you two questions, A & B, together. Question A is a question about your parents' birth date. Question B is about a sensitive topic.

Instead of responding directly to each question, you should respond to the questions jointly.

Simply indicate whether your answers to the two questions are:

- identical (*both responses "No", or both "Yes"*)
- different (*one response "Yes", the other "No"*)

This way we do not know your response to the sensitive question.

Because birth dates are approximately evenly distributed over the year, we can estimate the aggregate share of "Yes" and "No" responses on the sensitive topic without knowing your individual response.

These page timer metrics will not be displayed to the recipient.

First Click: 0 seconds.

Last Click: 0 seconds.

Page Submit: 0 seconds.

Click Count: 0 clicks.

Question A:

\$_{e://Field/rnd_cmnrq_1t}

(If you do not know, please use the birth date of someone else you know.)

Question B:

Have you ever intentionally taken something from a store without paying for it?

Compare your responses to questions A & B. Are they identical or different?

- ☐ Identical (*both responses "No" or both "Yes"*)
- ☐ Different (*one response "Yes", the other "No"*)

These page timer metrics will not be displayed to the recipient.

First Click: 0 seconds.

Last Click: 0 seconds.

Page Submit: 0 seconds.

SQ: RRT Benford (RRTbenf)

To secure your privacy and to make you feel comfortable answering the following questions, we employ a special survey technique.

It works by presenting you two questions, A & B. Question A is a question on a sensitive topic. Question B is about your mother's birth date.

A random number, generated by you, and known only to you, determines whether you have to respond to question A or question B.

This way we do not know whether you responded to the sensitive question or to the birth date question.

We can only estimate the aggregate share of "Yes" and "No" responses for all respondents.

These page timer metrics will not be displayed to the recipient.

First Click: 0 seconds.

Last Click: 0 seconds.

Page Submit: 0 seconds.

Click Count: 0 clicks.

Now you will generate a random number, which determines whether you will respond to question A or question B.

1. Please think of an acquaintance of yours who doesn't live in your household and whose address you know.
2. Ready? Take the first digit of the house number (e.g. "3" for the house numbers 3, 37, or 348).

3. Remember this digit. It is your personal random number for the following questions.

These page timer metrics will not be displayed to the recipient.

First Click: 0 seconds.

Last Click: 0 seconds.

Page Submit: 0 seconds.

Click Count: 0 clicks.

Please respond to question A or B according to your random number.

If your random number is 1, 2, 3, 4, or 5 ⇒ question A:

Have you ever intentionally taken something from a store without paying for it?

If your random number is 6, 7, 8, or 9 ⇒ question B:

\${e://Field/rnd_benfunrq_1t}

(If you do not know, please use the birth date of someone else you know.)

☐ Yes

☐ No

SQ: RRT pick a number (RRTpick)

To secure your privacy and to make you feel comfortable answering the following questions, we employ a special survey technique.

It works as follows: Before responding you will randomly pick a number from 1 to 12, which determines, whether you have to:

- directly tick the "Yes" response button
- directly tick the "No" response button
- answer a sensitive question and tick the response button corresponding to your answer

We don't know whether you had to directly tick a predetermined response button or whether you

answered the sensitive question, because you alone know the number you have picked and the corresponding instruction.

As such, a "Yes" response could be the result of you directly ticking the "Yes" response button or of having answered the sensitive question "Yes". By taking into account the share of respondents that had to directly tick a predetermined response, we can estimate the aggregate share of "Yes" and "No" responses to the sensitive question without knowing your individual response.

These page timer metrics will not be displayed to the recipient.

Testquest pickB

The following task is a little strange. However, please, carefully follow the procedure.

You will randomly pick a number from 1 to 12. According to that number you will be assigned a letter: A, B, or C.

1. Please, think of a number between 1 and 12.

2. Got your number?

If yes, click the "Show letter!" button:

Show letter!

3. Which letter was assigned to you?

- ☐ A
- ☐ B
- ☐ C
