UniBe Look-Up

- Clear identification of members of the university and their affiliations -> bibliographic data can be used for research evaluation without further controls or changes.
- Information is always up-to-date (e.g. when affiliations or names change)
- Other informations systems can use the ORCID from the staff database
- Posibility to automatically match affiliations with ddc classifications
See also:
- How to register your ORCiD and link it to BORIS
- boris-orcid-connect on Vimeo
BORIS (Bern Open Repository and Information System) has asked for the following access to your ORCID Record:

- Update your affiliations
- Update your biographical information
- Update your works
- Update your funding items
- Create or update your activities
- Read items in your ORCID record
- Add a person identifier
- Add education or employment
- Read your ORCID record
- Read your biographical information
- Add works
- Add funding items
- Get your ORCID iD

As per ORCID's terms and conditions, you may only register for an ORCID iD for yourself.

Description
In this article, Dirk Verdicchio addresses the display of sexuality in cinematic movies on finance. He argues that the display of sexuality can be seen as a representation of the financial economy and asks how finance is perceived when it is envisioned by means of sexuality. Referring to George Bataille’s concepts of economy, heterogeneity, and erotics he argues that the display of sexuality in these films endangers conventional, bourgeois ideals and values – in Bataille’s terms: the financial economy threatens social homogeneity because of an inherent heterogeneity of the stock exchange. According to the analyzed movies, the financial economy is not only the site where the rationality of the economy appears in its purest form, but also the site where this principle collapses and turns into its opposite.

Welcome to Zurich Open Repository and Archive

ZORA (Zurich Open Repository and Archive) provides open and worldwide access to the research and scholarly output of the University of Zurich, Switzerland. A focus is on qualified scientific publications. ZORA is operated by the Main Library together with the Zentrale Informatik of the University of Zurich.

> Common meta data scheme (in discussion)
> Collecting APC data (in discussion)

German speaking area (GER, CH, AU)
> Annual German EPrints User Group meetings at Open-Access-Tage
Problems

- Development is slow. It takes too much time before new features are introduced (e.g. responsive design, ORCID).
- It’s not clear how development is funded. Is there sufficient funding?
- It’s not transparent how priorities are set? How are interests outside from the UK included?
- Who can be addressed when there is a need for development? What happens with the code on github? Who will integrate it in an official release?
- It’s becoming increasingly difficult to justify the use of Eprints, since there is an impression that Eprints development is discontinued. There are several universities in Switzerland that decided against EPrints because of this (ETHZ, ZHAW), others which are under pressure from university management or are looking for alternatives.
- Communication about developments or plans is poor (at best).
Questions

> How can the situation be improved?
> How can we contribute in making development faster and communication better?
> How can we make sure that our investments are secured?
